Full Stack Developer passionate about solving real-world problems through scalable software and clean code. Experienced building complete web applications, mobile apps, and business systems with Laravel, Angular, React, Flutter, and Spring Boot. Self-driven, detail-oriented, and focused on delivering maintainable solutions that bring real value to the business.

Technical Skills

- **Backend:** Laravel, Spring Boot
- **Frontend:** Angular, Bootstrap, CSS, HTML, jQuery, Xml
- **Mobile:** Dart, Flutter
- **Databases:** Cassandra, FireBase, Mongodb, MySQL, PostgreSQL, SQL Server
- **Languages:** C++, Java, JavaScript, PHP, Python, TypeScript
- **Platforms & CMS:** Odoo, WooCommerce, WordPress
- **Tools & Technologies:** cPanel, DevExpress, Github, Swagger, WebRTC (CRT)

Professional Experience

DEVELOP | EPPRAIDON | NOV 2025 – NOV 2025

Project : Industrial Safety Equipment Store

Description:

- Custome Temes

Stack: PHP, JavaScript, WordPress, WooCommerce, MySQL, HTML, CSS, Github

---

FULL STACK DEVELOPER | CLÍNICA CAYETANO HEREDIA | JUN 2022 – JUN 2023

Project : Integrated Hospital System

Description:

- I was part of the development team for a modular Integrated Health System aimed at enhancing clinical and administrative processes.
- I worked on backend components using C# and DevExpress, documented APIs with Swagger, and built advanced frontend interfaces with Angular and TypeScript.
- I was responsible for key modules such as appointment scheduling, PDF-based clinical records, and specialized functionalities for obstetrics and gynecology.

- I also optimized system performance through efficient SQL Server queries, contributing significantly to the digital transformation of the healthcare environment.

Stack: HTML, CSS, Github, TypeScript, C++, Angular, SQL Server, Mongodb, Swagger, DevExpress

---

FULL STACK WEB DEVELOPER | PREVENTIVE WOMEN'S HEALTH | JAN 2022 – MAY 2022

Project : Digital Clinical Platform

Description:

- I led the development and maintenance of eldoctor.pe, a medical platform focused on women's healthcare services, using Laravel as the main framework alongside jQuery, JavaScript, and MySQL.
- I implemented critical features such as appointment scheduling, virtual consultations, dynamic form validations, government API integrations, and automated medical reports.
- I also handled server and domain management and optimized performance by migrating multimedia content to Amazon S3, ensuring system efficiency and scalability.

Stack: JavaScript, MySQL, HTML, CSS, Github, Laravel, jQuery, WebRTC (CRT)

FULL STACK DEVELOPER | SYSTEC SISTEMAS (TIENDAS TEC – E-COMMERCE WEBSITE) | JUN 2021 – DEC 2021

Project : Tec Stores — Sales & Technical Service System

Description:

- I developed an e-commerce platform using WordPress, HTML, CSS, JavaScript, and PHP.
- I customized templates, implemented a responsive design, configured payment gateways, and built product management features.
- The site was optimized for a seamless user experience across all devices.

Stack: JavaScript, Github, Odoo, Xml, PostgreSQL, Python

FULL STACK DEVELOPER | SYSTEC (CAFÉ COLONIAL – RESTAURANT MANAGEMENT SYSTEM) | DEC 2020 – MAY 2021

Project : Restaurant ERP System (Odoo) - Café Colonial

Description:

- I developed a complete restaurant management system including POS, kitchen display, and inventory control modules.
- The system was built using Odoo (QWeb), Python, PostgreSQL, JavaScript, HTML, and CSS.
- I customized order workflows, implemented role-based access control, and optimized real-time operations.

Stack: JavaScript, Github, Odoo, Xml, PostgreSQL, Python

FULL STACK DEVELOPER | SYSTEC SISTEMAS(CAFÉ COLONIAL – CORPORATE WEBSITE) | JUL 2020 – DEC 2020

Project : Corporate Website & Delivery - Colonial coffee

Description:

- I built a corporate website for a coffee shop chain, showcasing their brand identity, locations, and menu.
- Using WordPress, HTML, CSS, JavaScript, and PHP, I ensured cross-device compatibility and SEO optimization to increase visibility and engagement.

Stack: PHP, JavaScript, WordPress, WooCommerce, MySQL, HTML, CSS, Github

---

FULL STACK DEVELOPER | SYSTEC SISTEMAS (TIENDAS TEC – E-COMMERCE WEBSITE) | APR 2020 – JUL 2020

> **Project : Tech Stores**

Description:

- I developed an e-commerce platform using WordPress, HTML, CSS, JavaScript, and PHP.
- I customized templates, implemented a responsive design, configured payment gateways, and built product management features.
- The site was optimized for a seamless user experience across all devices.

Stack: PHP, JavaScript, WordPress, WooCommerce, MySQL, HTML, CSS, Github, cPanel

---

DEVELOPER | PERSONAL PROJECT | JAN 2020 – JAN 2020

> **Project : Expense Tracker**

Description:

- Mobile app built with Flutter & Firebase, email auth, full CRUD, and monthly/yearly expense charts.

Stack: Github, Dart, Flutter, FireBase

JUNIOR WEB DEVELOPER | SYSLACS | AUG 2019 – MAR 2020

> **Project : Administrative System for Schools and Clinics**

Description:

- At Syslacs, I contributed to the development of customized administrative systems for private schools and a healthcare clinic, using Spring Boot for backend development and TypeScript with Bootstrap for the frontend.
- I worked in a highly restricted environment without internet or external tools, which strengthened my problem-solving skills and deepened my understanding of core programming concepts.
- I also implemented unit testing to ensure software quality in a technically demanding setting.

Stack: JavaScript, HTML, CSS, Github, Spring Boot, TypeScript, Bootstrap, Cassandra, Java
